

Applications are invited for the position of:

Vascular Physiologist (Basic Grade)

This is a permanent role, 40 hours per week.

The Role:

The vascular Physiologist is responsible for assisting with the day to day running of the service

- To perform, interpret and report on ultrasound scans for vascular conditions, working at the level of basic grade vascular physiologist. They will work autonomously with the support of senior staff within the service
- To perform specific roles in day to day management of the department and will have specific duties within the service for which they will be responsible
- Perform vascular diagnostic tests using ultrasound and other equipment to obtain images and measurements necessary for successful conclusion of the tests
- Analyse requests from Doctors and select necessary test and prioritise them according to clinical need and resources available
- Make complex interpretive judgements based on interactively acquired ultrasound blood flow data and imaging
- Record test information clearly and accurately in appropriate media
- Communicate results and diagnostic information to referring clinicians with appropriate urgency including alerting the clinician when further investigation or treatment is indicated. Be able to communicate complex information clearly to clinicians to enable effective decisions
- Ensure all tests are conducted and reported to agreed protocols in accordance with protocols and with best practice
- Be responsible for patients' safety and well-being throughout examinations. Responsible for ensuring due care for patients who may present with a range of illnesses
- To support teaching and training activities within the service
- Undertake research and development in collaboration with clinical staff and other researchers, in accordance with the priorities of the service.
- Any other duties as assigned

Candidate Requirements:

- BSc in Clinical Measurement Science or Certificate in Medical Physics and Physiological Measurement or equivalent qualification.
- Maintain an up to date knowledge of scientific and technical practices. Maintain standards of CPD as required by professional body (I.I.C.M.S)
- Ideally be a member of the Society for Vascular Technology in Ireland
- Ideally have one year relevant experience in a Vascular Laboratory
- You should be able to work independently and as part of the team.
- Excellent organisational and interpersonal skills

- Demonstrate the initiative, drive and enthusiasm to carry out the role successfully
- Ability to work professionally at all times when dealing with patients, staff and the public
- Be able to multi-task and prioritise effectively. Flexibility essential.
- Flexibility with working hours to include weekend work.
- Self motivated, highly organised, able to communicate effectively with a wide range of people.
